

Towing Capacity Quick Calculator

1. Total Trailer Weight	Trailer Empty Weight + Cargo = Total Trailer Weight (Must be \leq Towing Capacity)
2. Estimate Tongue Weight (10–15%)	Total Trailer Weight \times 10–15% = Tongue Weight
3. Total Payload Used	Tongue Weight + Passengers + Bed Cargo = Total Payload Used (Must be \leq Payload Capacity)

Reminder: Never exceed your vehicle's towing or payload ratings. Check your owner's manual or manufacturer specifications before towing.
